

## Quiz #1

### Programming Fundamentals in Java

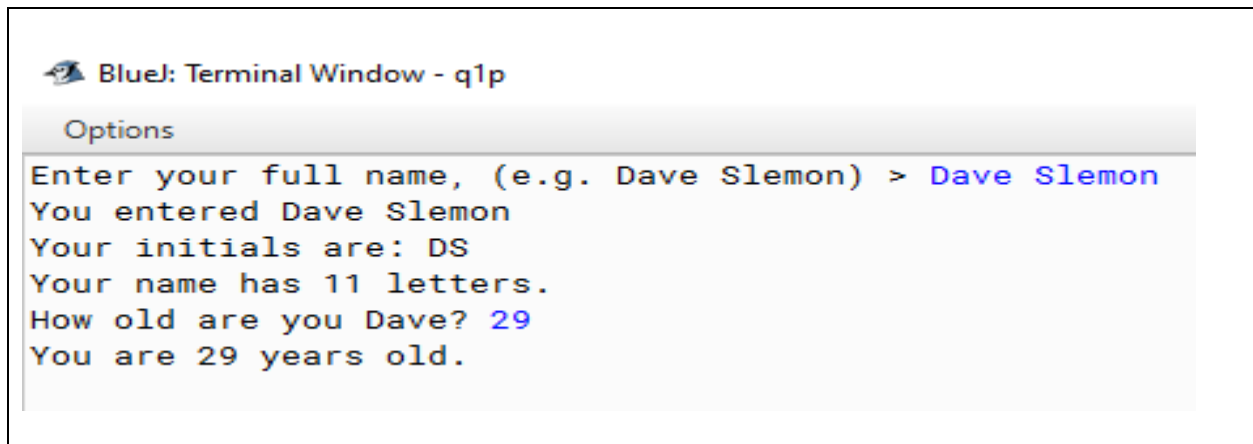

Write a JAVA program which matches the Sample Session EXACTLY!

The program begins by asking the user for their first and last name, in the format "firstName lastName"

- a. the name entered is echoed back to the user
- b. the person's initials are then displayed
- c. the length in characters of the person's name is displayed
- d. the program then asks the user for their age, (an integer number)
- e. lastly, the person's age is displayed.

BE SURE TO INCLUDE occasional comments within the code, as well as JAVADOC style comments at the top.

Sample Session

```
BlueJ: Terminal Window - q1p
Options
