# Quiz #2 - Arrays & For Loops
# Programming Fundamentals in Java

Consider the two associated arrays shown below in figure 1.    Associated means that the age of the person has the same index as their position in the other array.   i.e.  Mary's age is 16 etc. while Chris's age is 15.

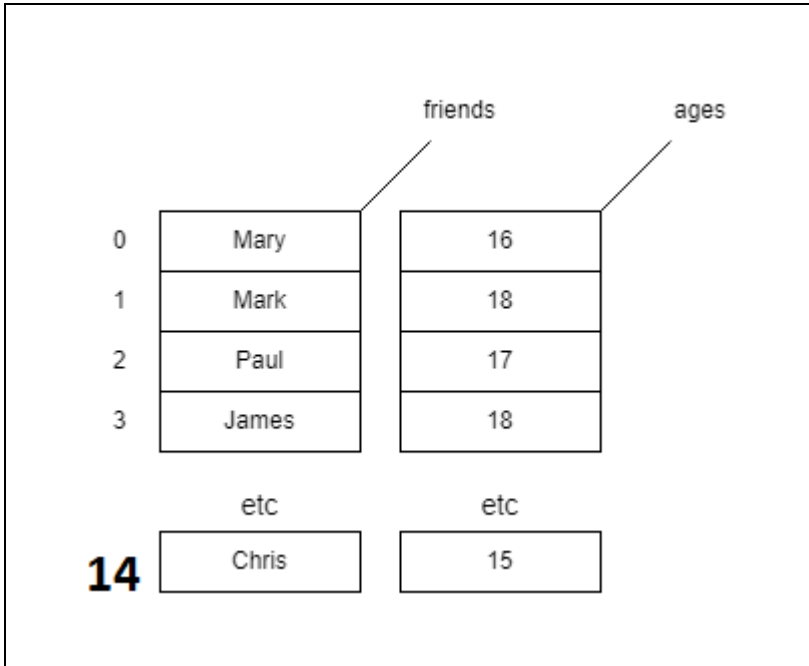

**Figure 1.  Two associated arrays**

Unzip the Java zip file called,  Q2.zip and complete the Java program so that it runs and produces the following sample session.   IMPORTANT:   your program needs to run correctly with any data values supplied for the ages.

Sample Session

```
The oldest friends are:
Sue
Kay
Cody
