

Worksheet 25

For Loops

Ask the user to enter an integer, N. Report back to the user what N! (i.e. N factorial) is.

Sample Session

```
Enter a number (e.g. 4) > 5
The factorial of 5 is 120
```

Review of factorial formula

$$n! = [1*2*3*4* \dots *n]$$

n! is "n factorial"
